

AL1641 – Southwestern highlands

Well AL1641 “YAJUZ NO 6” is located in the southwestern highlands area of the basin. The fit linear trend is $+9.2 \mu\text{S}/\text{cm}/\text{yr}$ ($R^2=0.73$). The data are largely consistent, although a few outliers may occur, one differing by about $300 \mu\text{S}/\text{cm}$ from the trend. The database contains only one measurement between 2000 and 2005. The EC has apparently increased at a faster rate for the last 6 years.
